

Pullet Grower Crumble

Note: This product is Anti-biotic and Hormone free

PRODUCT DESCRIPTION

Advanced Pullet Grower Crumble is a complete feed specifically designed for growing pullets from 8 weeks of age to point of lay. This feed can also be fed as a supplement to all types of growing birds.

Made to a commercial nutrient specification, this feed also contains poultry specific prebiotics and probiotics (think yoghurt for chooks), to help maintain the birds digestive health and maintain a healthy immune system.

Advanced Pullet Grower Crumbles are heat treated in a process that cooks the starch, changing the structure in a process called gelatinisation, to make the feed highly digestible.

Next time at your local produce store, check where some products sold in FNQ are actually made. You might be surprised to find some travel all the way from South Australia. Think of the food miles saved by supporting this high quality product made on the Atherton Tablelands from Queensland grown Corn, Sorghum and Wheat.

TYPICAL ANALYSIS: (AS-FED)

Min. Crude Protein	16.00%
Min. Calcium (Ca)	1.00%
Min. Crude Fat	3.00%
Min. Phosphorus (P)	0.50%
Max. Crude Fibre	8.00%
Max Salt (NaCl)	0.50%

ADDED MINERALS AND VITAMINS

Min. Ferrous Iron (Fe++)	50.0 mg/kg
Min. Manganese (Mn)	75.00mg/kg
Min. Zinc (Zn)	60.00 mg/kg
Min. Iodine (I)	0.75 mg/kg
Min. Cobalt (Co)	0.20 mg/kg
Min. Selenium (Se)	0.15 mg/kg
Min. Copper (Cu)	6.0 mg/kg
Min. Molybdenum (Me)	1.00 mg/kg
Min. Vitamin A	10,000.00 iu/kg
Min. Vitamin E	30.00 mg/kg
Min. Vitamin D3	2500.00 iu/ kg
Min. Vitamin B1	1.60 mg/kg
Min. Vitamin B2	8.00 mg/kg

Min. Vitamin B6	4.00 mg/kg
Min. Vitamin B12	0.02 mg/kg
Min. Niacin	45.0 mg/kg
Min. Biotin	0.135 mg/kg
Min. Pantothenic Acid	15.00 mg/kg
Min. Folic Acid	2.00 mg/kg

DIRECTIONS FOR USE

For best results feed free choice to pullets from 8 weeks of age to point of lay (when first eggs are laid). No other feed is required.

You may want to treat your chickens by recycling some fruit and vegetable scraps from the kitchen. You should be aware that too much fruit and vegetables can dilute the high mineral and protein levels the bird needs to maintain adequate growth rates.

A lot of people don't realise if kitchen scraps may contain meat product or have been in contact with meat products it is called 'swill' and should not be fed to chickens.

An extract from the Qld Government web site, " Legislation in Queensland's [Biosecurity Act 2014](#), outlaws feeding swill to poultry. This applies to all poultry, including pet poultry and poultry owned by hobby farmers. Penalties for swill feeding include fines and imprisonment."

Pullet Grower Crumbles have a calcium level which is designed to meet the needs of the growing pullet. At point of lay this calcium requirement increases significantly to meet the demands of egg shell production. While Layer feed should not be fed to growing birds before 2 weeks before the onset of lay, feeding Pullet Grower Crumbles to laying birds will quickly deplete their calcium reserves and result in poor egg production and shell quality. It is best to mix 50/50 pullet and layer feed about 1 week before the expected point of lay.

Advanced Rural have a feeding program for rearing hens from day old. Advanced Chick Starter Crumbles should be fed from hatching to 8 weeks of age. Advanced Pullet Grower Crumbles should be fed from 8 weeks to the onset of lay.

ADVANCED RURAL

Right feed! Right results!

ADVANCED RURAL

Pullet Grower Crumble

Changes from one feed to another are best made gradually to allow birds to adapt and accept the new feed type.

Advanced Pullet Grower Crumbles is heat treated in a process that kills salmonella. This makes the feed safer for the birds and the eggs safer for your family to eat.

Having the feed in the form of a crumble ensures every piece is the same and the birds can't pick and choose the bits they like best and leave the fines in the bottom of the feed tray or the floor of the pen.

WARNING

Always keep feed troughs clean and remove stale feed. Ensure fresh, clean drinking water is always available.

STORAGE

Feed is best store under cover in a cool, dry place below room temperature (30°C.)

In the tropics keeping feed over the wet humid months is always a challenge. Keeping feed in sealed containers to keep insects and moisture out will maximise shelf life.

Crumble feed such as the Advanced Pullet Grower Crumble have been heat treated in the pelleting process, will have a better shelf life than mash type feeds that have not been heat treated. Although pelleted feeds start off insect free, they will eventually come under attack after a long period of storage.

Insect infestations like web moth, lemon mite and weevils are quite common in the tropics and although undesirable, they do not make feed unusable.

Mouldy feed will result if moisture levels increase above 14 % in hot weather. Feed left in the bag or open containers will absorb moisture in hot humid weather.

Mould can produce toxins and chickens can be very sensitive to mould toxins. Mouldy feed should never be fed to poultry.

FEED IS BEST USED BEFORE 6 MONTHS FROM
DATE OF MANUFACTURE.

Poultry feeds can contain commercially processed meat, bone, blood and fish meals and rendered animal fats. These products are not considered swill and are normal inclusions in high quality poultry feeds. These products are collectively known as Restricted Animal Material (RAM). Feeding RAM to Cattle, sheep, Goats, Deer or other Ruminants is illegal.

It is important poultry feed is stored securely to avoid accidental ingestion by animals that are not allowed to eat RAM.

This feed has been formulated specifically for animals described on the package, or the label attached to the package, and must not be used for other species of animals. Unsuitable for human consumption. The manufacturer accepts no responsibility if this feed is used in quantities, conditions or in any way other than in accordance with the manufacturer's recommendations. The manufacturer's recommendations for the use of this product may be obtained by contacting the Advanced Rural office.

**This product contains restricted animal material
- DO NOT FEED TO CATTLE, SHEEP, GOATS, DEER OR OTHER RUMINANTS**
