STUD CATTLE PELLETS

Animal Feed only.

PRODUCT DESCRIPTION

Advanced Stud Cattle Pellets are a pelleted feed designed as a supplement for preparing Stud Cattle for show or sale.

This feed is medicated with 30mg/kg Monensin Sodium for improved feed conversion efficiency and as an aid in the prevention of coccidiosis caused by *Eimeria zuernii* and *Emiria bovis*. Feed containing Monensin must not be fed to horses, sheep or dogs. There is no withholding period for cattle.

Advanced Stud Cattle Pellets, are proudly manufactured in Far North Queensland. They are designed to meet the energy, protein, vitamin and mineral requirements for stud cattle over 5 months of age. Being in a pellet form, the grain component has been finely ground and heat treated in the pelleting process to gelatinise the starch. This process makes the energy more digestible in the rumen and ensures calves can fully digest the starch and utilise the high energy.

TYPICAL ANALYSIS: (AS-FED)

Min. Crude Protein	15.00%
Min. Calcium (Ca)	1.00%
Min. Crude Fat	2.50%
Min. Phosphorus (P)	0.60%
Max. Crude Fibre	8.00%
Max. Salt (NaCl)	1.50%

ADDED MINERALS AND VITAMINS

Min. Vitamin A	6500.00 iu/kg
Min. Vitamin D3	800.00 iu/kg
Min. Vitamin E	15.00mg/kg
Min. Manganese (Mn)	70.00mg/kg
Min. Copper (Cu)	45.00mg/kg
Min. Zinc (Zn)	150.00 mg/kg
Min. Iodine (I)	1.00 mg/kg
Min. Cobalt (Co)	1.50 mg/kg
Min. Selenium (Se)	0.40 mg/kg

FEEDING DIRECTIONS

Stud Cattle Pellets are suitable for cattle from 5 months of age. Feeding rates will depend on age and condition of cattle. Typical feeding rates are 1 to 1.5 kg per 100kg of live weight.

Conditioning Stud Cattle is best done slowly over 3 to 4 months with moderate feeding rates. Excessive and rapid weight gain in young animals can result in confirmation and fertility problems.

Always provide access to grass in the paddock or hay and chaff in the yards. Introduce pellets gradually to avoid overconsumption. If practical animals of similar sizes should be penned together to avoid bullying. Provide adequate trough space so all cattle can access pellets.

Ensure fresh, clean drinking water is always available.

Seek advice from an Advanced Rural representative.

STORAGE

Feed is best store under cover in a cool, dry place below room temperature (30°C.)

In the tropics keeping feed over the wet humid months is always a challenge. Keeping feed in sealed containers to keep insects and moisture out will maximise shelf life.

Insect infestations like web moth, lemon mite and weevils are quite common in the tropics and although undesirable, they do not make feed unusable.

Mouldy feed will result if moisture levels increase above 14 % in hot, humid weather. Feed left in the bag or open containers will absorb moisture in tropical conditions.

Mould can produce toxins and cattle can be sensitive to mould toxins. Mouldy feed should never be fed to cattle.

FEED IS BEST USED BEFORE 6 MONTHS FROM DATE OF MANUFACTURE.

STUD CATTLE PELLETS

WARNING

Do not allow dogs, horses or other equines access to this feed. Ingestion of Monensin by dogs and horses has been fatal.

This feed has been formulated specifically for animals described on the package, or the label attached to the package, and must not be used for other species of animals. Unsuitable for human consumption. The manufacturer accepts no responsibility if this feed is used in quantities, conditions or in any way other than in accordance with the manufacturer's recommendations. The manufacturer's recommendations for the use of this product may be obtained by contacting the Advanced Rural office.

THIS PRODUCT DOES NOT CONTAINS RESTRICTED ANIMAL MATERIAL.

This feed is available in 25 kg bags, 1tonne bulk bags and bulk deliveries.
