## MFC 160 FINISHER with MONENSIN

**Animal Feed only.**

### PRODUCT DESCRIPTION

Advanced MFC 160 Finisher with Monensin is a concentrate designed to be mixed with molasses at the rate of 160kg of Concentrate to 840kg of molasses and fed to fatten cattle.

Molasses is a good source of available energy from sugars but it needs protein and minerals added to be utilised efficiently as a production feed. When molasses is mixed with Advanced MFC 160 Finisher with Monensin at the recommended rate this feed can be used as a production feed to finish cattle.

This feed is medicated with 280mg/kg Monensin Sodium for improved feed conversion efficiency and as an aid in the prevention of coccidiosis caused by *Eimeria zuernii* and *Emiria bovis*.

Advanced MFC 160 Finisher with Monensin, is proudly manufactured in Far North Queensland.

### TYPICAL ANALYSIS: (AS-FED)

Total Min. Crude Protein	50.00%
Min. Equivalent Crude Protein	72.00%
Min. Crude Protein	14.00%
Min. Urea	25.00%
Min. Calcium (Ca)	3.00%
Min. Crude Fat	1.00%
Min. Phosphorus (P)	4.60%
Max. Crude Fibre	6.00%
Max Salt (NaCl)	20.00%

### ADDED MINERALS AND VITAMINS

Min. Copper (Cu)	450.00mg/kg
Min. Manganese (Mn)	700.00mg/kg
Min. Zinc (Zn)	1500.00 mg/kg
Min. Iodine (I)	10.00 mg/kg
Min. Cobalt (Co)	15.00 mg/kg
Min. Selenium (Se)	1.0 mg/kg
Min. Vitamin A	65,000.00 iu/kg
Min. Vitamin D3	8000.00 iu/ kg
Min. Vitamin E	150.00 mg/kg

### DIRECTIONS FOR USE

For best results mix with molasses at 16% by weight. (160kg of MFC 160 + 840kg of Molasses to make 1 tonne of mixed feed, or 1x25kg bag to 100 litres (140kg) of molasses. Note that 1 litre of molasses is normally about 1.3kg to 1.4kg. Feed molasses and concentrate well mixed in troughs. Molasses and concentrate mixes can safely be fed free choice. While best fed under cover, light rain on the mixed molasses can safely be consumed as it will pool on the surface and not mix into the molasses.

Ensure adequate trough space for consistent intake.

The difference between the Advanced MFC 160 Finisher with Monensin and Advanced MFC 60 with Monensin is the fine milled grain included at 100kg or 10%. This grain component lifts the energy level but also helps improve effective utilisation of the high sugar levels to finish cattle.

Molasses and MFC 160 Finisher with Monensin can be fed to all cattle over 5 months of age.

This product contains urea which may be poisonous if consumed in excessive quantities or too quickly. Ensure concentrate and molasses are adequately mixed. Mixed feed should be consumed within 7 days or remixing may be required due to separation.

This concentrate is not a complete feed. Always mix with molasses at recommended rates.

Always provide access to grass in the paddock or hay and chaff in the yards.

Ensure fresh, clean drinking water is always available.

Seek advice from an Advanced Rural representative.

### STORAGE

Feed is best store under cover in a cool, dry place below room temperature (30°C.)

FEED IS BEST USED BEFORE 6 MONTHS FROM DATE OF MANUFACTURE.
