

ADVANCED RURAL

Right feed! Right results!

MFC 60 With MONENSIN

Animal Feed only.

PRODUCT DESCRIPTION

Advanced MFC 60 with Monensin is a concentrate designed to be mixed with molasses at the rate of 60kg of Concentrate to 940kg of molasses and fed to cattle.

Molasses is a good source of available energy from sugars but it needs protein and minerals added to be utilised efficiently as a production feed. When molasses is mixed with MFC 60 at the recommended rate this feed can be used as a production feed to grow out weaners and finish cattle.

This feed is medicated with 800mg/kg Monensin Sodium for improved feed conversion efficiency and as an aid in the prevention of coccidiosis caused by *Eimeria zuernii* and *Emiria bovis*.

Advanced MFC 60 with Monensin, is proudly manufactured in Far North Queensland.

TYPICAL ANALYSIS: (AS-FED)

Total Min. Crude Protein	86.00%
Min. Equivalent Crude Protein	72.00%
Min. Crude Protein	14.00%
Min. Urea	25.00%
Min. Calcium (Ca)	3.00%
Min. Crude Fat	1.00%
Min. Phosphorus (P)	4.60%
Max. Crude Fibre	6.00%
Max Salt (NaCl)	20.00%

ADDED MINERALS AND VITAMINS

Min. Copper (Cu)	450.00mg/kg
Min. Manganese (Mn)	700.00mg/kg
Min. Zinc (Zn)	1500.00 mg/kg
Min. Iodine (I)	10.00 mg/kg
Min. Cobalt (Co)	15.00 mg/kg
Min. Selenium (Se)	1.0 mg/kg
Min. Vitamin A	65,000.00 iu/kg

WARNING

Do not allow dogs, horses or other equines access to this feed. Ingestion of Monensin by dogs and horses has been fatal.

Min. Vitamin D3	8000.00 iu/ kg
Min. Vitamin E	150.00 mg/kg

DIRECTIONS FOR USE

For best results mix with molasses at 6% by weight. (60kg of MFC 60 + 940kg of Molasses to make 1 tonne of mixed feed, or 1x25kg bag to 300 litres (420kg) of molasses. Note that 1 litre of molasses is normally about 1.3kg to 1.4kg. Feed molasses and concentrate mixed in troughs, free choice to maximize weight gains. May also be used as a supplement feed by limiting intake to desired levels by feeding set quantities on set days. Ensure adequate trough space for consistent intake.

Molasses and MFC 60 with Monensin can be fed to all cattle over 5 months of age.

This product contains urea which may be poisonous if consumed in excessive quantities or too quickly. Ensure concentrate and molasses are adequately mixed. Mixed feed should be consumed within 7 days or remixing may be required.

This concentrate is not a complete feed. Always mix with molasses at recommended rates.

Always provide access to grass in the paddock or hay and chaff in the yards.

Ensure fresh, clean drinking water is always available.

Seek advice from an Advanced Rural representative.

STORAGE

Feed is best store under cover in a cool, dry place below room temperature (30°C.)

FEED IS BEST USED BEFORE 6 MONTHS FROM DATE OF MANUFACTURE.
