

ADVANCED RURAL

Right feed! Right results!

GOAT POWER PELLETS

Animal Feed only. This product is Anti-biotic and Hormone free.

PRODUCT DESCRIPTION

Advanced Goat Power Pellets are a high energy, high protein supplementary feed with added minerals and vitamins, suitable for adult goats kept for milk, meat and fibre. They can also be fed as a supplement to breeding goats and their kids from 3 days of age. Goat Power Pellets are proudly manufactured in Far North Queensland. Being in a pellet form, the grain component has been finely ground and heat treated in the pelleting process to gelatinise the starch. This process makes the energy more digestible in the goat's rumen.

TYPICAL ANALYSIS: (AS-FED)

Min. Crude Protein	16.00%
Min. Calcium (Ca)	1.00%
Min. Crude Fat	2.00%
Min. Phosphorus (P)	0.50%
Max. Crude Fibre	10.00%
Max Salt (NaCl)	1.25%

ADDED MINERALS AND VITAMINS

Min. Ferrous Iron (Fe++)	80.00 mg/kg
Min. Manganese (Mn)	35.00mg/kg
Min. Zinc (Zn)	100.00 mg/kg
Min. Iodine (I)	1..25 mg/kg
Min. Cobalt (Co)	0.40 mg/kg
Min. Selenium (Se)	0.25 mg/kg

Min. Vitamin A	13,000.00 iu/kg
Min. Vitamin E	50.00 mg/kg
Min. Vitamin D3	2000.00 iu/ kg
Min. Vitamin K3	2.00mg/kg
Min. Vitamin B1	1.60 mg/kg
Min. Vitamin B2	7.50 mg/kg
Min. Vitamin B6	3.00 mg/kg
Min. Vitamin B12	0.025 mg/kg
Min. Niacin	25.0 mg/kg
Min. Biotin	0.20 mg/kg
Min. Pantothenic Acid	12.50 mg/kg
Min. Folic Acid	1.60 mg/kg

DIRECTIONS FOR USE

Feed as a supplement to good quality pasture, hay or chaff. Roughage should provide no less than half the weight of the total diet and should be freely available. The amount of Goat Power Pellets fed, will depend on body condition score, quality of grass or hay available and the level of production required.

Feeding rates are typically between 1% and 2% of animal live weight. At higher feeding rates it is recommended to split into morning and night feeds. Feeding rates need to be adjusted to suit individual goats' requirements based on performance.

Growing Kids and lactating Nannies may require Goat Power Pellets to maintain growth rates and milk production, when pasture quality is low.

Goats are ruminant animals. That is, they have 4 stomachs that are designed to digest grass and roughage. Pasture or hay must always form the base of the goat's diet to keep the digestive system functioning properly.

Any changes to feeding programs should be made gradually over several weeks. Introduce Pellets gradually and blend with existing feeds to allow the goats to adapt to a new feed type.

Ensure fresh, clean drinking water is always available.

STORAGE

Feed is best store under cover in a cool, dry place below room temperature (30°C.)

In the tropics keeping feed over the wet humid months is always a challenge. Keeping feed in sealed containers to keep insects and moisture out will maximise shelf life.

Pelleted feed such as the Goat Pellets that have been heat treated in the pelleting process, will have a better shelf life than mash type feeds that have not been heat treated. Although pelleted feeds start off insect free, they will eventually come under attack after a period of storage.

ADVANCED RURAL

Right feed! Right results!

GOAT POWER PELLETS

Insect infestations like web moth, lemon mite and weevils are quite common in the tropics and although undesirable, they do not make feed unusable.

Mouldy feed will result if moisture levels increase above 14 % in hot weather. Feed left in the bag or open containers will absorb moisture in hot humid weather.

WARNING

This feed has been formulated specifically for animals described on the package, or the label attached to the package, and must not be used for other species of animals. Unsuitable for human consumption. The manufacturer accepts no responsibility if this feed is used in quantities, conditions or in any way other than in accordance with the manufacturer's recommendations. The manufacturer's recommendations for the use of this product may be obtained by contacting the Advanced Rural office.

Mould can produce toxins and goats can be very sensitive to mould toxins. Mouldy feed should never be fed to goats.

FEEED IS BEST USED BEFORE 6 MONTHS FROM
DATE OF MANUFACTURE.

This product does not contain restricted animal material.
